

# Luca Bonamini

ROBOTICS SOFTWARE ENGINEER

Via Antoniana 68, La Spezia, Italy

☎ (+39) 329 404 2683 | ✉ [lucabonamini28@gmail.com](mailto:lucabonamini28@gmail.com) | 🌐 [lucabonamini.github.io](http://lucabonamini.github.io) | 📄 [luca-bonamini](https://www.linkedin.com/company/luca-bonamini)

## Summary

Luca Bonamini is currently a **Software Engineer** with a focus on **Autonomous Driving** at **Yape s.r.l.**. He received his Bachelor Degree in **Mechanical Engineering** from University of Genova and the Master Degree in **Robotics and Automation Engineering** from University of Pisa, in 2015 and 2018, respectively. After graduation he started a collaboration as Research Fellow at Robotics Research Center “E. Piaggio” of the University of Pisa, where he joined Roboteam Italia, one of the teams of **Roborace**, an autonomous full scale electric racing car competition. He joined **Proxima Robotics s.r.l.** in 2020, where he was responsible for developing planning and control algorithms for mobile robots.

## Work Experience

### Yape s.r.l.

SOFTWARE ENGINEER | AUTONOMOUS DRIVING

- Design of navigation architecture for a delivery robot

Milan, Italy

Apr. 2021 - Present

### Proxima Robotics s.r.l.

ROBOTICS SOFTWARE ENGINEER

- Develop a trajectory planning algorithm in a Frenet Frame for obstacle avoidance for a service robot
- Develop an Adaptive Pure Pursuit controller for path tracking for a service robot
- Develop tools for offline data debug and visualization
- Design and implementation of a CI/CD pipeline

Pisa, Italy

Mar. 2020 - Mar. 2021

### Roboteam Italia

SOFTWARE ENGINEER | STATE ESTIMATION, PLANNING AND CONTROL

- Develop an optimal trajectory planning algorithm for lane change and obstacle avoidance for autonomous racing cars
- Develop a lidar-based localisation system for autonomous racing cars in a GNSS denied environment
- Develop interfaces between ROS ecosystem and real-time sensors for a self-driving car
- Contribute to the development of an MPC controller for real-time path tracking

Pisa, Italy

Dec. 2018 - Mar. 2020

### Research Center “E. Piaggio”

RESEARCH FELLOW

- Develop an Augmented Reality system to assist mobile robots teleoperation
- Collaborate on Alter-EGO project dealing with the development of an autonomous navigation stack

Pisa, Italy

Dec. 2018 - Mar. 2020

## Education

### University of Pisa

M.S. IN ROBOTICS AND AUTOMATION ENGINEERING

- Towards a shared autonomy control framework: application to Ego robot navigation

Pisa, Italy

Sept. 2015 - Exp. Nov. 2018

### University of Genova

B.S. IN MECHANICAL ENGINEERING

- Design of a two-stage parallel shaft gear reducer

Genova, Italy

Sept. 2012 - Sept. 2015

## Skills

### Programming

C++, ROS, ROS2, Python, Matlab/Simulink, HTML/CSS, JS

### Libraries

STL, Boost, Eigen, Qt

### Planning Algorithms

Dijkstra, A\*, RRT\*, Lattice, DWA, Potential Field, Optimal Trajectory generation

### Control Algorithms

PID, LQR, MPC, Apative Pure Pursuit

### Real-Time Sensors

GPS, IMU, LIDAR, Speed sensors

### Message Protocols

Protobuf, CAN

### DevOps

Docker, GitLab CI/CD, Bash scripting

### Tools

GitLab, Git, CMake, gdb

### Languages

Italian, English

## Publications

---

- **LiDAR-Based GNSS Denied Localization for Autonomous Racing Cars.** Massa, F.; Bonamini, L.; Settini, A.; Pallottino, L.; Caporale, D. . *Sensors* 2020, 20, 3992.

## Certifications

---

2011    **First Certificate in English (FCE)**, Grade A, University of Cambridge ESOL Examinations

*La Spezia, Italy*
